Bachelor of Border Management (1414BP)

Our Bachelor of Border Management is designed to provide you with essential knowledge and skills in the customs and border management field.

Whether you're currently working in government or involved in trade, both nationally and internationally, this degree can enhance your qualifications and open up new career opportunities in border management and related professions.

The course, crafted in collaboration with industry, government, and international agencies, including the World Customs Organization, is highly practical. It focuses on real-world case studies and assessments directly applicable to your workplace. This approach allows you to seamlessly apply what you learn to your job, with a strong emphasis on disciplines like law, public administration, and management.

By the time you graduate, you'll have advanced expertise in international trade regulation, trade facilitation, and administration, making you well-prepared for professional roles in commerce or the public sector.

Upskill and exceed

The Bachelor of Border Management will provide the skills required for entry or progression to a range of jobs in the customs and border management field.

Upon graduation, you'll have the skills and knowledge necessary for advancing your career within the public and private sectors.

Your knowledge of international trade and regulatory compliance issues will make your skills desirable to a broad range of businesses involved in cross-border trade.
